

Custom Software Dev & Support for Battery Energy Storage Co

PROJECT DETAILS

 Custom Software Development, Application Testing

 Jul. 2022 - Sep. 2024

 \$10,000 to \$49,999

“
"I highly recommend Truesight Technologies for anyone looking for skilled professionals in software development."

PROJECT SUMMARY

Truesight Technologies provided software expertise for a battery energy storage company. The team implemented and integrated the SunSpec protocol with the client's energy storage system units.

PROJECT FEEDBACK

Truesight Technologies successfully wrote efficient and reliable C++ code that optimized the system's performance and enhanced its communication capability using the SunSpec protocol. The team was timely, communicated excellently, and showed exceptional skill, leading to a smooth collaboration.

The Client

Please describe your company and position.

I am the Chief Operating Officer of Smartville, Inc.

Describe what your company does in a single sentence.

Development and manufacturing of BESS and battery assessment tools utilizing second-life batteries

The Challenge

What specific goals or objectives did you hire Truesight Technologies to accomplish?

- Implementing SunSpec protocol
- Software Development
- Seamless integration with company's products

Stephanie Aretz
COO, Smartville, Inc.

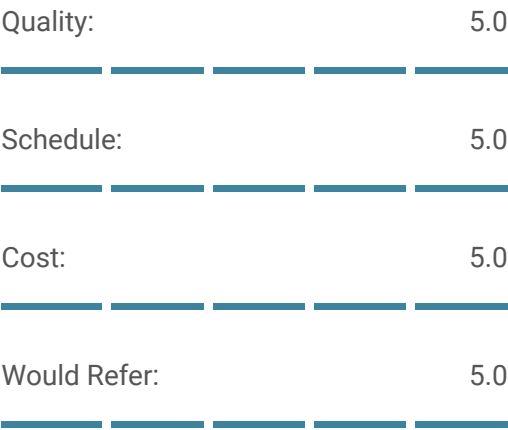

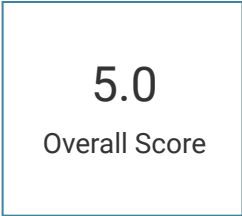

Engineering

Carlsbad, California

CLIENT RATING

The Approach

How did you find Truesight Technologies?

Online Search

Why did you select Truesight Technologies over others?

High ratings

How many teammates from Truesight Technologies were assigned to this project?

2-5 Employees

Describe the scope of work in detail. Please include a summary of key deliverables.

We engaged Truesight Technologies for their expertise in software development, specifically for implementing the SunSpec protocol in our energy storage system (ESS) units.

The Outcome

What were the measurable outcomes from the project that demonstrate progress or success?

The team demonstrated exceptional technical skills, particularly in writing efficient and reliable C++ code that optimized our system's performance. Their contributions significantly enhanced our system's capability to communicate using the SunSpec protocol, enabling seamless integration with other components.

Describe their project management. Did they deliver items on time? How did they respond to your needs?

The collaboration was smooth, with excellent communication and timely delivery of solutions.

What was your primary form of communication with Truesight Technologies?

Virtual Meeting

What did you find most impressive or unique about this company?

Truesight Technology's ability to understand the complex requirements of our ESS and provide tailored solutions was impressive. I highly recommend Truesight Technologies for anyone looking for skilled professionals in software development and protocol implementation.

Are there any areas for improvement or something Truesight Technologies could have done differently?

N/A
